

A Personal Testimony by Krissy

Hi, my name is Krissy and I am so blessed that I found this product. I was laying in bed in with a bad fibromyalgia flare-up, when I turned on Channel 18 and saw the infomercial for Nopalea.

I am a woman of strong faith and I had been praying for some answers to my worsening condition.

I was so excited to hear the testimonials, but was somewhat skeptical. I have tried a lot of products over the years for my Lyme's Disease, chronic yeast condition (candida), and fibromyalgia, some of which worked fairly well. I never found anything, however, that could knock out my candida or fibromyalgia.

I can honestly say that within **two days** there was a change. I felt a sense of well being that had been missing for along time. All the sudden, I felt so creative again and had a new spring in my step.

The following week the pains that were in my hip, knee and shoulder were gone. No more headaches either. I found myself multitasking all day and into the evening. My energy had increased and my candida was improving dramatically. I used to be a person that only planned the things I *had* to do that day because I knew there would come a point in the day when I wouldn't feel well. But now, I don't even think about what's ahead of me in a day. I am living life to the fullest.

I have my husband taking Nopalea now because he would come home everyday with pain in his legs, neck and back. After three weeks with him on it, he is noticing significant improvement in his pain and he just told me tonight he's sleeping well all through the night.

My daughter who they thought may have ADD started taking the Adaptogen 10 Plus and Sublingual B-12 to help her manage the stress from all her homework, sports schedule and demands of being a teenager. She's concentrating much better, has more energy and hasn't complained about her homework load. I am so pleased with her results and I am much relieved she is off her Adderall prescription drug.

My hope and prayer is that anyone whose health is compromised, has pain, lack of energy, or missing a sense of well being that they would give this a try. Everyone today is so skeptical because everyone claims they have the answer... well, guess what, Trivita's got it right!!
